

Innovation at Work

RADIAL TRACKED STOCKPILERS

RTS80

- Radial Tracked Stockpiler allowing MASSIVE stockpiling capacity
- 360° continuous rotation for superior manoeuvrability
- Eliminates material segregation
- Largest capacity radial tracked stockpiler available
- Massive application flexibility
- Can be fed by any Crusher or Screener
- Can reduce fuel maintenance and loader costs by up to 80%
- Eliminate / reduce need for Wheel Loader on-site
- Dramatically increase Crusher / Screener plant productivity and efficiency

OPTIONS

- Automatic radial + raise function
- Radio remote control radial + raise / lower conveyor
- Dual power
- Diesel genset/ electric hydraulic power pack / twin direct electric drive
- Dual wheel drive
- Belt widths from 36" (900mm) - 48" (1200mm) available

Innovation at Work

FEATURES

- Huge windrow stockpiling capacity
- User friendly control system
- Hydraulic raise + lower head and tail sections
- 30% more efficient diesel genset availability
- Containerised for global transportation
- Heavy-duty lattice frame construction
- Stockpile rates 100 tph - 1000 tph
- Deutz or Caterpillar engine available

APPLICATIONS

- Construction + demolition waste (C+D)
- Sand + gravel
- Compost
- Topsoil
- Wood waste
- Mulch
- Scrap metal
- Aggregates
- Coal
- Food products
