

TRANSITION FRAMES

**QPI'S TRANSITION FRAMES
CAN BE FITTED WITH 4" OR 5"
DIAMETER ROLLERS AND
IS ONE TROUGHING SET FOR
ALL POSITIONS.**

Transition frames allow rollers to be
"drop in" type with no additional fixings
for replacing rollers

Transition frames are galvanised to 140 microns and are adjustable from 20 to 45 degrees in 5-degree increments.

Transition sets can be used under feed areas & fitted with impact rollers
Providing 3 identical equal rollers results in less stock holding requirements; Easy to
change the troughing angle of the conveyor to suit requirements.

(Stock available from 600mm wide to 1200mm wide)
